About SRL,

The Scientia Research Library (SRL) is ardent to promote erudite, pragmatic, and contemporaneous research work in the broad area of research. SRL has taken an initiative to setup e-Journals and categorized the research field for peer –reviewed, open access journals to be published. The aim is to provide a platform for researchers from most of the science discipline to present new research and developments in their respective area. The SRL covers all areas of Engineering and Technology , applied science & research and applied chemistry publishing original research articles.

Paper Published in our journals are highly recognized throughout world, as our journals are indexed in many international database and many more indexing are in process.

The goal is to promote scientific information interchange between researchers, developers, engineers, students, and practitioners working in and around the world.SRL will provide an opportunity for practitioners and educators of engineering field to exchange research evidence, models of best practice and innovative ideas.

We also like to inform you that now all the published research with us is now indexed with **crossref. We provide the DOI for all the published articles .**

Please share the information of our journals with your known researchers and students.
